Location: Cairo, Egypt Military Status: Exempted

Profile

Business Intelligence Developer and Data Analyst with hands-on experience in Power BI, Tableau, SQL, and ETL design. ITI-trained under Egypt's Ministry of Communication & Information Technology. Skilled in data modeling, DAX, and dashboard storytelling. Strong mathematical and analytical foundation with a focus on turning raw data into actionable insights.

Experience

Business Intelligence Developer Intern — *Information Technology Institute (ITI)*

Feb 2025 – Jul 2025

Ministry of Communication and Information Technology, Egypt

- Built ETL pipelines and data warehouse models using SQL Server, improving report query performance and accuracy.
- Created Power BI dashboards and SSRS reports using DAX to visualize KPIs and business performance.
- Collaborated in Agile sprints, managing version control and data documentation with Git.

Math Teacher (Freelance) — *Tanta, Egypt / Remote*

Sep 2022 – Feb 2025

- Delivered mathematics lessons in Arabic and English; designed automated grading tools using Google Sheets.
- Strengthened analytical and storytelling skills through data-based visualization methods in teaching.

Skills

Programming & Analysis:	Python, SQL, NumPy, pandas, scikit-learn
Data Visualization:	Power BI, Tableau, DAX, Power Query
Database Systems:	SQL Server, MongoDB
ETL / BI Tools:	SSIS, SSAS, SSRS
Data Modeling:	Star schema, snowflake schema, dimensional modeling
Other:	API integration, Linux, Bash scripting, prompt engineering

Projects

Examination System — Intelligent Assessment & Analytics Platform

[View Project](#)

- Developed an end-to-end BI solution using SQL Server with automated ETL for assessment analytics.
- Built Power BI dashboards and SSRS reports visualizing instructor KPIs, scores, and question insights.

Superstore Advanced Sales & Profit Insights — Tableau

[View Project](#)

- Built Tableau dashboards analyzing sales, profit, and regions with parameter-driven interactivity.

- Delivered executive-level insights through KPI storytelling and optimized data models.

Airlines Delay Analysis — Power BI

[View Project](#)

- Modeled flight delay data in a star schema with DAX-based KPIs to track delay causes and trends.
- Designed dashboards with map and trend visuals for operational decision support.

Facebook Posts Performance Dashboard — Power BI

[View Project](#)

- Automated Facebook Graph API data extraction using Power Query for post engagement tracking.
- Created mobile-friendly dashboards visualizing reach, reactions, and audience activity.

SSIS ETL Automation — SQL Server Integration Services

[View LinkedIn Post](#)

- Automated ETL pipelines with SSIS, including transformations, merges, and error-handling workflows.
- Enhanced data reliability with logging, validation, and performance optimization.

Customer Churn Prediction — Python & Streamlit

[View Project](#)

- Built a churn model using Naive Bayes with 82% accuracy after feature engineering and cleaning.
- Deployed an interactive Streamlit app enabling real-time churn analysis and what-if scenarios.

Education

B.Sc. in Mathematics & Statistics — Faculty of Science, Tanta University Sep 2017 – Jun 2023

Graduation Project: A+

Courses & Certifications

- **Learning Data Analytics: Foundations** — LinkedIn Learning, 2025
- **Power BI Essential Training** — LinkedIn Learning, 2025
- **Learning Excel: Data Analysis** — LinkedIn Learning, 2025

Languages

Arabic (Native) — English (Proficient, B2 Level)
