CAREER OBJECTIVE

- Aspiring Data Analyst and BI Developer with 5 months of professional training experience at ITI in Egypt and proficiency in SQL, Python, Excel, and Power BI. Skilled in collecting, cleaning, and analyzing data to uncover actionable insights and design dashboards that support data-driven decision-making. Passionate about leveraging analytical and statistical techniques to solve business problems efficiently.

EXPERIENCE

- **Business Intelligence Developer Intern — Information Technology Institute (ITI)** *Feb 2025 – Jul 2025*
BI & Data Integration Developer (Ministry of Comm and info technology) Egypt
 - Built ETL pipelines and data warehouse models in SQL Server, improving report performance
 - Developed Power BI dashboards and SSRS reports with DAX to visualize KPIs.
 - Worked in Agile sprints, managing version control and data documentation with Git.
- **Freelance** *Sep 2022 – Feb 2025*
Math & Statistics Educator Remote & In-person, Egypt
 - Simplified mathematics and statistics concepts, strengthening analytical and communication skills, while designing exams and collecting student performance data using Google Forms and Google Sheets for performance tracking.

EDUCATION

- **Tanta University** *2017 – 2023*
B.Sc. in Mathematics and Statistics (Graduation Project: A+) Tanta, Egypt
 - Graduated with a Good grade, with strong foundations in advanced mathematics and descriptive and inferential statistics, and completed an analytical research project

TECHNICAL SKILLS

Integration: SSIS (Expert), ETL Automation, Data Lineage
Databases & SQL: Oracle PL/SQL, SQL Server (T-SQL), Stored Procedures, Index Optimization
Data Modeling: Dimensional Modeling (Star/Snowflake Schema), Normalization, SCD Type 1/2
BI & Visualization: Power BI (DAX, Power Query), Tableau, SSRS
Tools & Analytics: Git, Linux/Bash, Python (Pandas, NumPy), Agile (Scrum), Statistics
Soft Skills: Stakeholder Management, Agile Methodology, Creative Problem Solving, Communication skills

PROJECTS

- **Fraud Detection Analytics — Data Warehouse & BI Project**
Project Link
 - Designed and implemented a fraud analytics data warehouse using SQL with a star schema, role-playing dimensions (sender/receiver), and SCD Type 2.
 - Conducted SQL-based exploratory data analysis to identify fraud patterns and financial exposure across customers, merchants, channels, account types, and risk segments, preparing a Power BI model for monitoring dashboards.
- **Superstore Advanced Sales & Profit Insights — Tableau**
Project Link
 - Built Tableau dashboards analyzing sales, profit, and regions with parameter-driven interactivity.
 - Delivered executive-level insights through KPI storytelling and optimized data models.

•Excel Sales Dashboard — Last Month Analysis

Project Link

- Built an Excel-based dashboard summarizing monthly sales performance and profitability
- Used advanced formulas and conditional formatting for visual clarity and trend analysis.

•Customer Churn Prediction — Python & Streamlit (Machine Learning)

Project Link

- Built a churn model using Naive Bayes with 82% accuracy after feature engineering and cleaning.
- Deployed an interactive Streamlit app enabling real-time churn analysis and what-if scenarios
