

Ahmed Almahey

BI Developer — Data Analyst

✉ ahmed.almahey77@gmail.com  LinkedIn  GitHub  Portfolio
Phone: +20-155-267-2575 Location: Cairo, Egypt Military Status: Exempted

Career Objective

Aspiring Data Analyst and BI Developer with proficiency in SQL, Python, Excel, and Power BI. Skilled in collecting, cleaning, and analyzing data to uncover actionable insights and design dashboards that support data-driven decision-making. Passionate about leveraging analytical and statistical techniques to solve business problems efficiently.

Experience

Business Intelligence Developer Intern — *Information Technology Institute (ITI)*
Feb 2025 – Jul 2025

Ministry of Communication and Information Technology, Egypt

- Built ETL pipelines and data warehouse models in SQL Server, improving report performance.
 - Developed Power BI dashboards and SSRS reports with DAX to visualize KPIs.
 - Worked in Agile sprints, managing version control and data documentation with Git.
-

Math Teacher (Freelance) — *Tanta, Egypt / Remote* Sep 2022 – Feb 2025

Education

B.Sc. in Mathematics & Statistics — Faculty of Science, Tanta University Sep 2017 – Jun 2023
Graduation Project: A+

Skills

Databases & SQL:	Oracle PL/SQL, SQL Server, T-SQL, Stored Procedures, MongoDB
BI & Visualization:	Power BI (DAX, Power Query), Tableau, SSRS
ETL & Modeling:	SSIS, SSAS, Dimensional Modeling (Star/Snowflake Schema), ETL Automation
Analysis & Python:	Python (Pandas, NumPy, Scikit-learn), Descriptive Modelling, Statistics
Tools & Soft Skills:	Git, Linux/Bash, Agile, Service Management, Stakeholder Communication

Projects

Fraud Detection Analytics — Data Warehouse & BI Project

- Designed and implemented a fraud analytics data warehouse using SQL with a star schema, role-playing dimensions (sender/receiver), and SCD Type 2.
- Conducted SQL-based exploratory data analysis to identify fraud patterns and financial exposure across customers, merchants, channels, account types, and risk segments, preparing a Power BI model for monitoring dashboards.

Superstore Advanced Sales & Profit Insights — Tableau

[View Project](#)

- Built Tableau dashboards analyzing sales, profit, and regions with parameter-driven interactivity.
- Delivered executive-level insights through KPI storytelling and optimized data models.

Excel Sales Dashboard — Last Month Analysis

[View Project](#)

- Built an Excel-based dashboard summarizing monthly sales performance and profitability
- Used advanced formulas and conditional formatting for visual clarity and trend analysis.

Customer Churn Prediction — Python & Streamlit

[View Project](#)

- Built a churn model using Naive Bayes with 82% accuracy after feature engineering and cleaning.
- Deployed an interactive Streamlit app enabling real-time churn analysis and what-if scenarios.
